The Speaker
United States House of Representatives
Washington, D.C., 20510

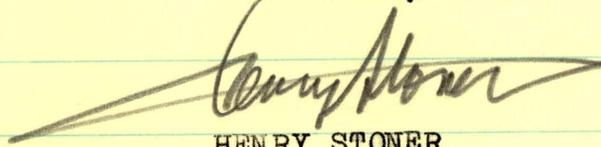

Dear Mr. Speaker:

I hereby petition the U.S. House of Representatives, Sir, through you, its honored Speaker, to highly congratulate, via Resolution, the National Aeronautics and Space Administration for the great success on July 31, 1964, ~~of~~ of its ~~Ranger VII~~ Ranger VII photographic flight to the moon.

It was a great relief to watch and hear the scientists responsible for this successful flight in search of photographs on TV explaining it all to the press and to the public. It is a relief, I repeat, to listen to men who use their reason, and not their political passions, which seem to be predominant now in discussing political questions in this Nation.

Success of our lunar projects, success of our Civil Rights and Reapportionment are only a few of the things America as a Nation must be successful in during the somewhat immediate future. Stupidity and reaction at any given moment can always take over a political and national endeavor, sorry to say. BUT WE WILL GET THE WORLD WITH US BY BEING SUCCESSFUL IN OUR GREAT PROJECTS!

AMERICANLY,

HENRY STONER
